

Serial No. : 2022-0454 DATE: 2022/6/1

SPECIFICATION

Product Name

CRYSTAL OSCILLATOR

Туре

DSO221SXF

Nominal Frequency

45.1584MHz

Spec No.

7FE04515A08

If there is a change in this specifications, the specification number may be changed.

#2	GND
#3	Output
#4	Vcc

Unit : mm Dimensional tolerance : ±0.15 (Unless otherwise noted)

- 6.2 Marking
 - (1) Model code SXF
 - (2) Frequency ex.) 45.1584MHz \rightarrow 45.1
 - (3) Logo
 - (4) Lot No. ex.) $2022/01/01 \rightarrow 201$

D

- Year : The last digit of the year
 - Week : We gave the sequence of week numbers 01(first week) for production date.

There are starting from 1st of Jan. However, add '0' figure to the first week during the nine weeks. The week means are from Sunday to Saturday.

		Remark		

7. Mechanical characteristics

7.1 Shock

7.1.1 Mounting drop

A soldered and mounted FR-4 board with thickness of 1.6mm is attached to 100g of aluminum material, and 10cycles of X, Y and Z axis directions (6 directions) are dropped on the concrete from height of 150cm. The component shall satisfy requirement of frequency change before and after is within \pm 8ppm.

7.1.2 Acceleration

6ms/1000m/s² to X, Y and Z axes (6directions), 10times. The component shall satisfy requirement of frequency change before and after is within ±8ppm. No visible damage.

7.2 Vibration

Vibration frequency 10 \sim 2000Hz, amplitude 1.5mm (10 \sim 55Hz), acceleration 200m/s² (55 \sim 2000Hz), X, Y and Z direction with 20min period.

The component shall satisfy requirement of frequency fluctuation before and after pretreatment ±8ppm. No visible damage.

7.3 Sealing tightness

Leak Rate 1.0×10^{-9} Pa·m³/s max. measured by Helium leak detector.

- 7.4 Solderability Rosin flux and immerse in soldering bath at +245±5℃ for 3±0.5s, and 90% or more of the terminal area is new. It must be covered with solder.
- 7.5 Resistance to soldering heat (Reflow)

When the reflow profile in section 10.1 is measured after 3 times, after returning to room temperature (2h intervals) and leaving it for 24 or 48h.

The component shall satisfy requirement of frequency change before and after is within ± 8 ppm. No visible damage.

8. Environment characteristics

8.1 Humidity

 $+60\pm2^{\circ}$, $90\sim95\%$ R.H., Duration of 240h. Back to the room temperature first, then in 24h, the component shall be checked. The component shall satisfy requirement of frequency change before and after is within ±8 ppm. No visible damage.

8.2 Storage in low temperature

 -40 ± 2 °C, Duration of 240h. Back to the room temperature first, then in 24h, the component shall be checked. The component shall satisfy requirement of frequency change before and after is within ±8ppm. No visible damage.

8.3 Storage in high temperature

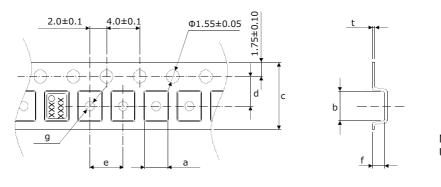

+85±2℃, Duration of 240h. Back to the room temperature first, then in 24h, the component shall be checked. The component shall satisfy requirement of frequency change before and after is within ±8ppm. No visible damage.

- 8.4 Temperature cycles
 -40°C (30min) ⇔+85°C (30min) Shift time 2~3min, 200cycles.
 Back to the room temperature first, then in 24h, the component shall be checked.
 The component shall satisfy requirement of frequency change before and after is within ±8ppm. No visible damage.
- 8.5 High temperature operation +85±2℃, maximum VCC, Duration of 240h. Back to the room temperature first, then in 24h, the component shall be checked.
 The component shall satisfy requirement of frequency change before and after is within ±8ppm. No visible damage.

9. Taping and Packing

9.1 Emboss carrier tape specifications

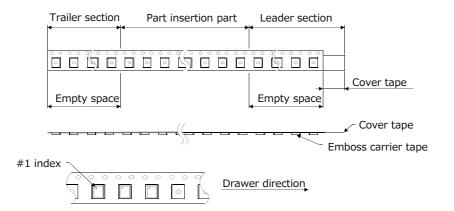

Material : PS (Conductivity) Unit : mm

Symbol	а	b	С	d	е	f	t	g
Size	2.3	2.8	8.0	3.50	4.0	1.15	0.30	Φ1.05
Size	±0.1	±0.1	±0.2	±0.05	±0.1	±0.10	±0.05	±0.05

9.2 Joint of tape

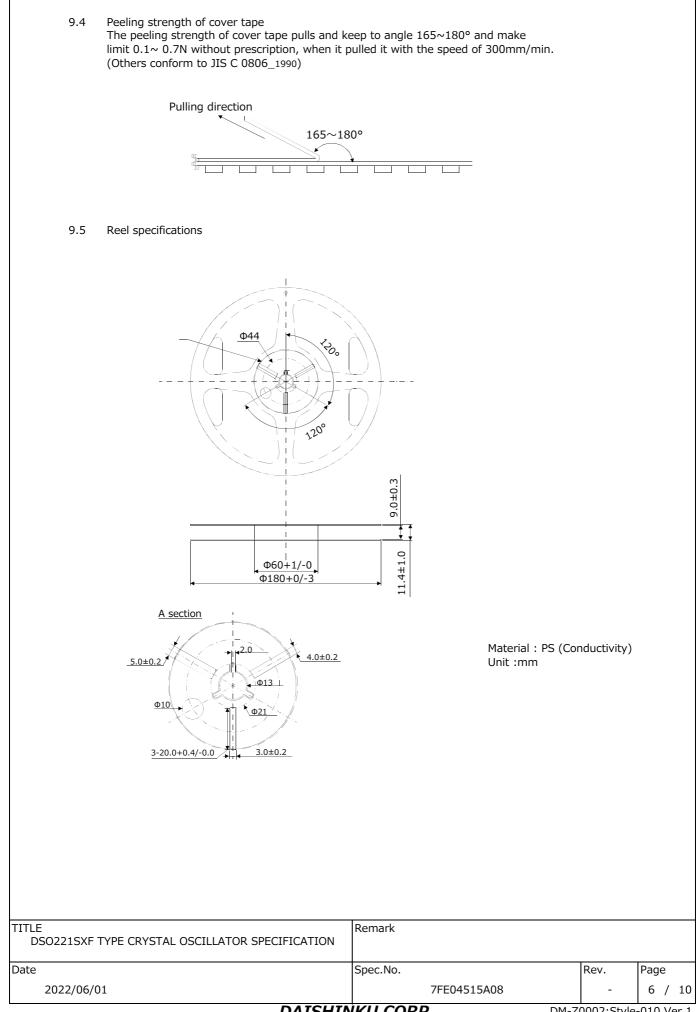

Emboss carrier tape and cover tape should not be jointed.

9.3 Taping dimension

Leader section Embo	Cover tape	The length of cover tape in the leader is more than 350mm including			
	cover tape	empty space area.			
	Emboss carrier	After all products were packaged, must remain more than 10pieces			
		or 150mm empty space area, which should be sealed			
	tape	by cover tape.			
	Cover tape	The empty space area which are sealed by cover tape must remain			
Trailer section	Emboss carrier	more than 350mm.			
	tape

- Standard packing quantity 9.7 3000pcs. / reel
- 9.8 Label

TITLE

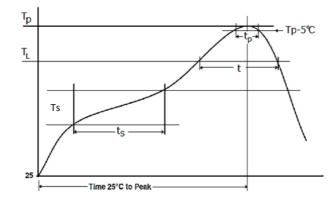

Date

A KDS label is put on a reel, and indication label and Pb-free label is put on packing box.

10 Supplement

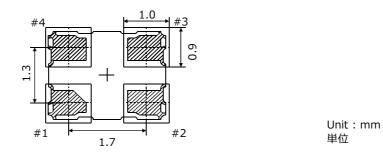

10.1 Reflow condition (Reference)

Ts	(℃)	$150 \sim 200$
ts time	(C) (S)	130 - 200 $60 \sim 120$
TL	(°C)	217
t time	(s)	$60\sim150$
Тр	(°C)	max. 260
tp	(s)	max. 30

10.2 Reflow count (Reference) Please stay with our proposed reflow condition and do then soldering 2times max.

10.3 Land pattern layout (Reference)

10.4 Mounting

This component is designed for automatic insertion.

However you are requested to do the trial with your insertion machine in order to be sure of proper operation and no damage of component.

Please pay attention to board warp which may damage the component and cause soldering process. Please mount so that the metalize side and other electrical conductivity structures (a main part lid is included) of the base side do not contact electrically.

10.5 Cleaning

Cleaning liquid which corrodes Nickel shall not be used. It may cause the problem on the surface color marking etc. Ultrasonic cleaning is possible however you are requested to check on your board. Because we only checked as single unit.

10.6 Handling

This product is designed to withstand Drop and Vibration, however, the crystal blank might be broken. So if excess force is given, please check the characteristics before use. This product has C-MOS circuit inside. Please pay attention to latch-up, static-electricity as same handling as other C-MOS devices.

10.7 By-pass capacitor

It has no by-pass capacitor integrated. we recommend you to use capacitor (like ceramic chip capacitor) 0.01μ F in-between Vcc and GND.

10.8 Storage

Please keep away from high temperature and high humidity, which may cause put solder ability. No direct Sunlight. No dew as well.

10.9 Thrust an ultrasonic cleaning

Because It use a small, thin crystal piece depending on a condition, the inside does resonance, and there is fear to cause the non-oscillation. When it's the worst, it may be destroyed. About the ultrasonic cleaning, it is use in the implementation of your company is in a state and confirming a thing without the influence in the appearance and a characteristic beforehand.

10.10 Point out supersonic wave welding

It can't recommend implementation by the supersonic wave welding and the processing so that the vibration excessive inside of the crystal oscillator propagates, and there is a threat that It cause characteristic deterioration and the non-oscillation.

10.11 RoHS compliance

Following material restricted by RoHS(2011/65/EU,(EU)2015/863) is not included or used.
